THE INNOVATOR

**Guaranteed Introductory Price!
Factory Assist & Transition training special
Transferable Reserved Serial Number
Flight Bag with Starter Kit**

**Fly into the future! Fast, comfortable, agile
...simply beautiful. The Innovator, setting a
new standard in aviation**

**The Innovator is a composite, blend wing-
three surface aircraft. With the widest and
most comfortable 2-place cockpit in general
aviation, the flight experience is that of a
luxury sports car featuring exceptional perfor-
mance with over 200mph top speed and in-
credible handling. Modern Styling and ad-
vanced safety measures make the Innovator
the new standard in General Aviation.**

**For the price of a luxury car, you can build your
Innovator airframe in as little as 2 weeks.**

Reserve your serial number and manufacturing position for only \$500

“INNOVATOR SERIES”

INTRODUCTORY SPECIAL

PROGRAM DESCRIPTION

For \$500 you can take the first step to building and flying your own Innovator Aircraft. You \$500 reserves a manufacturing position and serial number. It also counts 100% toward the purchase price.

Save up to \$10,000. When you reserve a position now you also get the “Introductory Sales Price” which is guaranteed. *(see details) This introductory offer also includes specials on Factory Assistance, engine, instrument and propeller options as well as 6 hours free transition training at the factory.

Every reserved position also comes with a starter kit including a Commuter Craft flight bag, X-Plane Software with Digital Models of Innovator Series Aircraft, Commuter Craft Dress Shirt, Builder’s Patch, Builder’s Pad as well as Builders Memory stick with Introductory Builders Video, Feature Selection Guide and Builder’s Log. A signed Poster by Aviation Photographer John Slemp will be included as well.

BUILDER PROGRAM

You build your Innovator Airframe in as little as 2 weeks. Innovator Series Aircraft are designed with a low part count, greatly reduce fabrication requirements and integral features to reduce build time but the program goes much further. All Innovator Airframes are built at the factory using alignment jigs and special tools. (You don’t need to bring any tools and please leave your hammer at home) Your personal coach will make sure all materials are staged in your building area and ready to go each morning. He will guide you through each step and support you through building and documentation. You will complete your airframe in 2 to 3 weeks and depending on your choice of engine, instruments and finishing options, your aircraft can be finished and ready to fly in as little as 2 months.

PRICE LIST

Innovator Series Base Kit is a very complete package of parts and materials required to build the Innovator basic airframe including all airframe composite parts, wheel pants, spinner, landing gear, flight controls, fuel tanks, hardware, adhesives, windows, windshield, power canopy and stairs, basic finishing kit and personalized flight bag.

Current options include: Power wing fold, deluxe light kit, dual controls, skylight, interior upholstery and paint.

Engine, Propeller, Instruments and Radio packages for your airplane will be offered at discounts as well.

All airframe kits are to be built in the factory using fixtures and specialized tooling included in the builder assist program.

Factory support for engine, instruments, radios and wiring installation available.

INTRODUCTORY SPECIAL

RESERVING YOUR POSITION

RESERVATION # _____

To reserve your position simply fill out the Position Reservation Information below. The contract for your aircraft will be made once order and key option decisions are made.

Name: _____ Spouse's Name _____

Address: _____

City: _____ State: _____ Zip: _____

Phone #: _____ Email Address: _____

Shirt Size: _____

Computer: MAC or PC (circle one)

Other Comments: _____

Form of Payment: Check: _____ Credit Card: _____ Cash: _____ Square _____

Signature: _____ Date: _____

ORDER PROCESS

Your reservation number notes your manufacturing position. You will receive your starter kit in 4 to 6 weeks. Your reservation is confidential and your information will not be shared with anyone.

Your starter kit will include an Innovator planning guide with details about options and services to personalize your aircraft. You can complete the aircraft order or wait until you get closer to your kit start date.

Manufacturing will begin with Alpha builders in fall of 2016. Beta builders will begin in early 2017 with general production aircraft starting mid-2017. Tooling and Production levels will be adjusted based on demand but will not be pre-sold beyond projected capacity through the end 2018.

You will be notified of your initial projected start date in September 2016 based on orders taken. At any time you may elect to push your schedule back based on your schedule however special pricing is only guaranteed until the last scheduled introductory sales orders are complete. You may transfer your position prior to firming up production date.

Once you have selected your build options and completed your order form, you can place you order. Ninety (90) days prior to your tentative start date, you will pay 50% of your total purchase price, less the \$500 paid reservation fee to firm up the production schedule. Another 25% will be due prior to arrival to start building your Innovator and the balance is due upon completion.

WE AT COMMUTER CRAFT LOOK FORWARD TO HELPING YOU BUILD YOUR DREAM AND WELCOME YOU TO OUR EXTENDED FAMILY OF AVIATORS. SINCERELY, RICHARD HOBAN, PRESIDENT
